Mahasweta Das
Senior Scientist
Transgenex Nanobiotech Inc
USA
mdas@health.usf.edu
OJT

Biography: I received my Ph.D. in Physiology from University of Calcutta, India and continued my research in Neuroscience at Michigan State University, University of Minnesota and University of South Florida. My present research interests include development of nanomaterial based theranostic strategies for neurodegenerative and neuroinflammatory conditions of the brain and delivery across the blood-brain barrier. Traumatic brain injury (TBI) is one such condition which causes significant mortality, long term disability and psychological symptoms. Drug delivery to the brain is challenging because of the blood-brain barrier. My research involves development of a strategy to make targeted delivery of drug/gene across the blood-brain barrier using magnetic nanoparticles and cell based techniques and simultaneous imaging. Another project I am involved with is to develop a novel 3D tumoroid platform to use for anti-cancer drug discovery, screening and targeting. My research has been published in several peer reviewed journals. I am also associated with different research and academic societies of India and USA.

Research Interest: Nanoparticle based drug/gene delivery across blood-brain barrier

Traumatic brain injury and therapeutics In vitro and in vivo tumor model development

Cancer therapeutics – cell based and nanomedicine Regenerative medicine

Fatih B
Associate Professor
Department of Emergency Medicine
Acibadem Eskisehir Hospital
Turkey
fatihbuyukcam@gmail.com
OJT

Biography: Dr.Fatih BÜYÜKCAM is an Associate Professor of Emergency Medicine at the Department of Emergency Medicine, Acibadem Hospital in TURKEY. After his Emergency Medicine Residency at Diskapi Education and Research Hospital in Ankara, he continued to work as consultant doctor at the same department. After two years of residency, he worked in Bağcılar Education and Research Hospital in Istanbul as the chief of the department for one year. He is the author of over 50 articles in scientific journals, additionally he is the thesis supervisor of 9 completed thesis. He completed the second university in Department of Medical and Technical Services for the Programme in Management of Health Institutions in Open Education Faculty of Anadolu University.

Research Interest: Trauma, cardiac emergencies, pediatric trauma, pediatric emergencies and toxicology.

[More Info.](#)

Jing Han
Department of Materials Process Engineering
Xi'an Jiaotong University
PR China
bbbishop@126.com
OJT

Research Interest: Osteoarthritis, Nutrition and Biomaterial.

[More Info.](#)

Susana Telles
Faculty of Medicine
Department of Neurology
University of Sao Paulo
Brazil
telles.susana@gmail.com
OJT

Research Interest: Neuroplasticity, periodic limb movements, restless legs syndrome, rehabilitation
