STRE-D-17-00297

Change from high-flow to titrated oxygen therapy in the prehospital setting is not associated with lower mortality in all COPD patients but among patients with acute exacerbations: an observational cohort study.

Scandinavian Journal of Trauma, Resuscitation and Emergency Medicine

Dear Dr. Büyükcum,

Thank you very much for your review of manuscript STRE-D-17-00297, 'Change from high-flow to titrated oxygen therapy in the prehospital setting is not associated with lower mortality in all COPD patients but among patients with acute exacerbations: an observational cohort study.'

We greatly appreciate your assistance.

Yours sincerely,

Julian Thompson
